September

Introduction to MSc in Engineering Management ...

Consolidate your engineering experience and gain the commercial awareness and management tools to take your career to the next level. Access the teaching excellence and career-enhancing opportunities synonymous with the University of Hull while you study flexibly online.

Course overview

By studying our MSc in Engineering Management, you will develop an advanced understanding of the management principles and practices needed to progress in an engineering organisation.

Our online learning model allows you to apply your new knowledge of best practices and techniques such as; Lean thinking, quality enhancement, project management, pricing and purchasing directly to your current profession.

Discover the practical benefits and positive impact an MSc in Engineering Management can have on your career today.

How you study

This course is offered 100% online, so you don't need to interrupt your work or personal commitments to study. Course content includes an engaging and interactive mix of video, podcasts and online presentations, with links to further resources and downloadable materials.

Online discussion forums will encourage interaction with your global network of peers, enabling you to share perspectives and debate current topics and issues in your field. You'll also be able to interact with members of the academic team through regular webinars and feedback.

All course content is available online through our easy-to-use, intuitive online learning platform that you can access via desktop or your mobile device anytime from anywhere.

Assessment

All assessments for this course are based on coursework and submitted online.

Your performance on the course will be assessed through a range of methods including:

- Ongoing tutor and peer feedback
- Practical work, including group projects and discussion forums
- Written work, including case studies, reports and essays

Career prospects

By studying this course, you'll gain valuable transferrable skills which are in-demand across the global engineering industry.

Roles open to MSc in Engineering Management graduates could include:

- systems engineer
- production engineer
- R&D engineer
- project engineer
- quality engineer
- business development executive

Entry requirements

A minimum 2:2 BEng degree in an engineering discipline or related subject (for example Science, Technology, Engineering and Mathematics (STEM) disciplines, Manufacturing etc.) or international equivalent.

Applicants who do not meet this requirement may still be considered but will need to present:

- Evidence of highest qualification achieved
- Evidence of any relevant professional qualifications or memberships
- Your current CV, highlighting relevant experience in detail (including managerial responsibilities within the context of an engineering organisation).

You may also be required to complete an admissions test and online interview.

An IELTS 6.0 score (with minimum 5.5 in each skill) if your first language isn't English (or other English language proficiency qualifications accepted by the University of Hull).

If you're unsure whether you're eligible to apply, please contact our course advisers on +44 (0)1482 235569 or email enquiries-online@hull.ac.uk.

Fees and funding

Course fees: £10,300 (including a £250 acceptance fee)

Payment can be made in full prior to commencing the course, or in 6 instalments over the duration of the course.
